

# Full Plant Profile<sup>®</sup> Extracts

*You can have it all!*

Natac introduces the Full Plant Profile: a new and revolutionary concept of extract based on a simultaneous concentration of the different phytochemical compounds of the plant that respects the original plant profile and substantially improves the effectiveness of the extract.

- **Significantly more effective**
- **Closer to the actual plant profile**

The activity of a plant is not only due to one active compound but to the combination of the diverse phytochemicals of a different nature present in that plant and to the synergy created among them.

While traditional extraction techniques focus on the extraction of only one group of compounds, renouncing the substantial health benefits reserved to the other phytochemicals, Natac's Full Plant Profile extracts gather all the benefits of the plant in a single extract.

Commercial  
extract # 1

Commercial  
extract # 2

Commercial  
extract # 3

**Full Plant Profile<sup>®</sup> Extract**  
Contains all the groups of phytochemical  
compounds described in the plant

Commercial  
extract # 4

**Add value to your products and differentiate from your competition with the exclusive Full Plant Profile<sup>®</sup> extracts developed by Natac.**

# The Olive & Grape Expert

Natac is an award-winning Spanish company that develops and produces value-added Mediterranean herbal extracts with a focus on olive tree and grapevine-derived ingredients.

Regarding Olive, Natac specializes in extracts highly concentrated in oleuropein, hydroxytyrosol, and triterpenic acids, and has developed innovative and highly effective olive tree-derived ingredients such as ALLOLIVE®.

In relation to Grapevine, Natac extracts and purifies grape pomace, skin, seed and lees as well as vine stems and leaves, among other, to offer high quality wine and vine-derived ingredients with high concentrations of polyphenols. Have you heard about NATAVID?

At our own manufacturing facilities, placed amid exuberant grape and olive orchards that provide the best raw material, we produce the most requested Mediterranean extracts as well as value-added and tailor-made formulations for clients looking to differentiate their products from the competition with unique ingredients.

In Madrid, our renowned R&D department is committed to constant innovation as evidenced by our revolutionary Full Plant Profile® extracts: a new concept of extract developed by Natac that respects the original plant profile and dramatically improves effectiveness.

At Natac we supply scientifically supported ingredients and adapt them to the particularities of your product. In addition, we guarantee high production capacity and flexibility. We adapt to help you grow your business.

Check out our website and learn how Natac can help you add value to your products.
