- Oxidation and oxidative stress
- Inflammation
- Type 2 diabetes and obesity

SPECIFICATIONS:

Oleuropein 20% (HPLC)
 β -Sitosterol 10% (HPLC)
 Oleonic Acid 10% (HPLC)

Maslinic Acid 3% (HPLC)
 Hydroxytyrosol 3% (HPLC)
 α -Tocopherol 3% (HPLC)

We settle for half the goodness when you can gather all the bioactive compounds of the olive tree in one extract?

The Olive & Grape Expert

Natac is an award-winning Spanish company that develops and produces value-added **Mediterranean herbal extracts** with a focus on olive tree and grapevine-derived ingredients.

Regarding Olive, Natac specializes in extracts highly concentrated in **oleuropein, hydroxytyrosol, and triterpenic acids**, and has developed innovative and highly effective olive tree-derived ingredients such as **ALLOLIVE®**.

In relation to Grapevine, Natac extracts and purifies grape pomace, skin, seed and lees as well as vine stems and leaves, among other, to offer **high quality wine and vine-derived ingredients with high concentrations of polyphenols**. Have you heard about NATAVID?

At our own manufacturing facilities, placed amid exuberant grape and olive orchards that provide the best raw material, we produce **the most requested Mediterranean extracts** as well as value-added and tailor-made formulations for clients looking to differentiate their products from the competition with **unique ingredients**.

In Madrid, our renowned R&D department is committed to constant innovation as evidenced by our revolutionary **Full Plant Profile® extracts**: a new concept of extract developed by Natac that respects the original plant profile and dramatically improves effectiveness.

At Natac we supply scientifically supported ingredients and adapt them to the particularities of your product. In addition, we guarantee high production capacity and flexibility. **We adapt to help you grow your business.**

Check out our website and learn how Natac can help you add value to your products.
